

[Green Atom Clean Engineering : 40 Years in the Making]

한국원자력학회 창립 40주년 학술대회 및 기념행사(안)

40th Anniversary

일시: 2009. 5. 18. (월) ~ 5. 23. (토)

장소: 제주 해비치호텔

40th Anniversary

한국원자력학회
www.nuclear.or.kr

-  The 4th Korea-China Workshop
on Nuclear Reactor Thermal Hydraulics
-  The 5th Workshop on Material for
Heavy Liquid Metal Coolant and Related
Technologies
-  The 10th Korea-Japan Joint Workshop
on PSA
-  NUPYRO 2009 : International Workshop
on Nuclear Pyroprocessing
-  IAEA Safety Forum

GREENE

Global Renewal Ecological Economical Nuclear Energy
May 18-23, 2009, Haevichi Hotel, Jeju, Korea

Invitation to KNS Anniversary

The Korean Nuclear Society (KNS) instituted in 1969 shall be celebrating its 40th anniversary. KNS boasts a history of unique professional activities in the field of nuclear science and technology in the Republic of Korea. KNS is currently home to more than 2600 individual members and 41 corporate members spanning academia, research institutions and industries. KNS sponsors conferences and lectures, publishes journals and newsletters, provides a forum for information exchange, promotes collaborative R&D, recognizes members of outstanding achievement, and awards scholarship to students. KNS strives to enliven the professional divisions' activities, enrich the membership service, rejuvenate the young generation network, and inaugurate student chapters. Mark your calendars for the following special event, and come join us to celebrate the 40th anniversary of KNS in emerald Jeju.

Preliminary Program

Monday, May 18, 2009	International Workshops on Thermal Hydraulics & Material Technologies
Tuesday, May 19, 2009	International Workshops on Thermal Hydraulics & Material Technologies
Wednesday, May 20, 2009	International & KNS Workshops, IAEA Safety Forum
Thursday, May 21, 2009	Celebrating the KNS 40 th Anniversary
Friday, May 22, 2009	KNS Spring Meeting
Saturday, May 23, 2009	Climbing Mt. Halla

Proposal for Future Forum

Nuclear energy is coming out of the shadows as a viable "green" source across the globe. From a recent call for the United States to "take advantage of clean, safe nuclear power," to plans to build new power plants in both hemispheres, nuclear is quickly remaking a strong contender as a new energy option. The KNS, celebrating its 40th anniversary in 2009, is proud to propose the Atoms Technology Outreaching Mankind International Congress (ATOMIC). The ATOMIC will lend itself to a world forum where every one of you in the Atoms Technology (AT) arena is welcome to discover what resurgence in nuclear science and technology would mean for the nuclear society. In this forum, you all will get lessons on the highlight issues and indicators in terms of political, technological and economy perspectives. ATOMIC will provide an opportunity for round-table discussions among the world atomic communities where the state-of-the-art information is exchanged, and the cutting-edge knowledgebase reinforced and cross-fertilized among the specialists, generalists, executives and policymakers from industry, laboratories academia and government. The KNS is delighted again to put forward this momentous congress for materialization in the thriving future by "green" atomic societies across "blue" earth in the balance. ATOMIC will need you all to hit the ground running soon.
