Original Articles

Nuclear I&C

- Approach towards qualification of TCP/IP network components of PFBR
Aditya Gour, Tom Mathews, and R.P. Behera3975
- Using machine learning for anomaly detection on a system-on-chip under gamma radiation
Eduardo Weber Wächter, Server Kasap, Şefki Kolozali, Xiaojun Zhai, Shoaib Ehsan, and Klaus D. McDonald-Maier3985
- ADA: Advanced data analytics methods for abnormal frequent episodes in the baseline data of ISD
Biswajit Biswal, Andrew Duncan, and Zaijing Sun3996

Nuclear Fuel Cycle and Radioactive Waste Management

- Evaluation on the buffer temperature by thermal conductivity of gap-filling material in a high-level radioactive waste repository
Seok Yoon, Min-Jun Kim, Seeun Chang, and Gi-Jun Lee4005
- Synthesis and application of zirconium phosphate mesoporous coordination polymer for effective removal of Co(II) from aqueous solutions
Yang Zeng, Guoyuan Yuan, Tu Lan, Feize Li, Jijun Yang, Jiali Liao, Yuanyou Yang, and Ning Liu4013
- Adsorption of hydrogen isotopes on graphene
Erica Wu, Christian Schneider, Robert Walz, and Jungkyu Park4022
- Preliminary data analysis of surrogate fuel-loaded road transportation tests under normal conditions of transport
JaeHoon Lim and Woo-seok Choi4030

Nuclear Fuel and Reactor Materials

- Development and validation of FRAT code for coated particle fuel failure analysis
Jian Li, Ding She, Lei Shi, and Jun Sun4049
- Corrosion behavior of aluminum alloy in simulated nuclear accident environments regarding the chemical effects in GSI-191
Da Wang, Amanda Leong, Qiufeng Yang, and Jinsuo Zhang4062
- Influence of ultrasonic impact treatment on microstructure and mechanical properties of nickel-based alloy overlayer on austenitic stainless steel pipe butt girth joint
Xilong Zhao, Kangming Ren, Xinhong Lu, Feng He, and Yuekai Jiang4072
- FAST irradiations and initial post irradiation examinations – Part I
G. Beausoleil, L. Capriotti, B. Curnutt, R. Fielding, S. Hayes, and D. Wachs4084

Nuclear Policy, Economics, and Human Resource Development

- Analysis of climate change mitigations by nuclear energy using nonlinear fuzzy set theory
Tae Ho Woo, Kyung Bae Jang, Chang Hyun Baek, and Jong Du Choi4095

Nuclear Physics, Fusion, and Laser Technology

- Improvement of lower hybrid current drive systems for high-power and long-pulse operation on EAST
M. Wang, L. Liu, L.M. Zhao, M.H. Li, W.D. Ma, H.C. Hu, Z.G. Wu, J.Q. Feng, Y. Yang, L. Zhu, M. Chen, T.A. Zhou, H. Jia, J. Zhang, L. Cao, L. Zhang, R.R. Liang, B.J. Ding, X.J. Zhang, J.F. Shan, F.K. Liu, A. Ekedahl, M. Goniche, J. Hillairet, and L. Delpech4102

Contents

Nuclear Structural Analysis /Plant Management & Maintenance

- Research on aging-related degradation of control rod drive system based on dynamic object-oriented Bayesian network and hidden Markov model
Kang Zhu, Xinwen Zhao, Liming Zhang, and Hang Yu4111
- Conceptual designs and characteristic of the fuel handling and transfer system for 150 MWe PGSFR and 1400 MWe SFR burner reactor
Kang-Soo Kim, Jong-Bum Kim, and Chang-Gyu Park4125
- Thermodynamic simulation and structural optimization of the collimator in the drift duct of EAST-NBI
Ning Tang, Chun-dong Hu, Yuan-lai Xie, Jiang-long Wei, Zhi-Wei Cui, Jun-Wei Xie, Zhuo Pan, and Yao Jiang4134
- Feasibility of UHPC shields in spent fuel vertical concrete cask to resist accidental drop impact
P.C. Jia, H. Wu, L.L. Ma, and Q. Peng4146

Nuclear Safety

- Application of CFD model for passive autocatalytic recombiners to formulate an empirical correlation for integral containment analysis
Vikram Shukla, Bhuvaneshwar Gera, Sunil Ganju, Salil Varma, N.K. Maheshwari, P.K. Guchhait, and S. Sengupta4159
- Determining the complexity level of proceduralized tasks in a digitalized main control room using the TACOM measure
Inseok Jang and Jinkyun Park.....4170
- Design optimization of a nuclear main steam safety valve based on an E-AHF ensemble surrogate model
Chaoyong Zong, Maolin Shi, Qingye Li, Fuwen Liu, Weihao Zhou, and Xueguan Song.....4181
- Habitability evaluation considering various input parameters for main control benchboard fire in the main control room
Byeongjun Kim, Jaiho Lee, Seyoung Kim, and Weon Gyu Shin.....4195

Radiation Application

- Developing an approach for fast estimation of range of ion in interaction with material using the Geant4 toolkit in combination with the neural network
Khalil Moshkbar-Bakhshayesh and Soroush Mohtashami4209
- Growth and characterization of detector-grade CdMnTeSe
J. Byun, J. Seo, J. Seo, and B. Park4215
- The effect of front edge on efficiency for point and volume source geometries in p-type HPGe detectors
Esra Uyar and Mustafa Hicabi Bölükdemir4220
- Characterization of neutron spectra for NAA irradiation holes in H-LPRR through Monte Carlo simulation
Kyung-O Kim, Gyuhong Roh, and Byungchul Lee4226
- Measurement of deuterium concentration in heavy water utilizing prompt gamma neutron activation analysis (PGNAA) in comparison with MCNPX simulation results
Saeed Salahi, Mahdieh Mokhtari Dorostkar, and Akbar Abdi Saray4231

Contents

Assessment of sediment profiles applying nuclear techniques: use of a nucleonic gauge in Panama Canal watershed Xavier Sánchez, Henry Hoo, Patrick Brisset, and Reinhardt Pinzón.....	4236
Development and verification of a novel system for computed tomography scanner model construction in Monte Carlo simulations Ying Liu, Ting Meng, Haowei Zhang, Qi Su, Hao Yan, and Heqing Lu.....	4244
Radiation protection	
Establishing a pre-mining baseline of natural radionuclides distribution and radiation hazard for the Bled El-Hadba sedimentary phosphate deposits (North-Eastern Algeria) S. Benarous, A. Azbouche, B. Boumehdi, S. Chegrouche, N. Atamna, and R. Khelifi.....	4253
¹³⁷ Cs, ⁴⁰ K and ²¹⁰ Po in abiotic components of aquatic ecosystems two rivers in the Can Gio biosphere reserve, Vietnam Ilya G. Sidorov, Nataliya N. Tereshchenko, Andrey A. Korotkov, Olga D. Chuzhikova-Proskurnina, Nguyen Trong Hiep, and Aleksandr V. Trapeznikov.....	4265
Reactor Physics	
McCARD/MIG stochastic sampling calculations for nuclear cross section sensitivity and uncertainty analysis Ho Jin Park	4272
STRAUM-MATXST: A code system for multi-group neutron-gamma coupled transport calculation with unstructured tetrahedral meshes MyeongHyeon Woo and Ser Gi Hong	4280
Thermal Hydraulics	
Mesh and turbulence model sensitivity analyses of computational fluid dynamic simulations of a 37M CANDU fuel bundle Z. Lu, M.H.A. Piro, and M.A. Christon	4296
Thermal study of a scanning beam in granular flow target Ping Lin, Yuanshuai Qin, Changwei Hao, Yuan Tian, Jiangfeng Wan, Huan Jia, Lei Yang, Wenshan Duan, Han-Jie Cai, and Sheng Zhang	4310
Remedy for ill-posedness and mass conservation error of 1D incompressible two-fluid model with artificial viscosities Byoung Jae Kim, Seung Wook Lee, and Kyung Doo Kim.....	4322
Water film covering characteristic on horizontal fuel rod under impinging cooling condition Penghui Zhang, Bowei Wang, Ronghua Chen, G.H. Su, Wenxi Tian, and Suizheng Qiu.....	4329
Benchmarking of the CUPID code to the ASSERT code in a CANDU channel Eun Hyun Ryu, Joo Hwan Park, Yun Je Cho, Dong Hun Lee, and Jong Yeob Jung	4338
Experimental assessment of thermal radiation effects on containment atmospheres with varying steam content R. Kapulla, S. Paranjape, U. Doll, E. Kirkby, and D. Paladino	4348
Assessment of turbulent heat flux models for URANS simulations of turbulent buoyant flows in ROCOM tests Zonglan Wei, Bojan Ničeno, Riccardo Puragliesi, and Ezequiel Fogliatto	4359
