

Contents

Nuclear I&C

- Dynamic data validation and reconciliation for improving the detection of sodium leakage in a sodium-cooled fast reactor
Sangjun Park, Jongin Yang, Jewhan Lee, and Gyunyoung Heo1528

Nuclear Fuel Cycle and Radioactive Waste Management

- Investigation of ^{180}W separation by transient single withdrawal cascade using Salp Swarm optimization algorithm
Morteza Imani and Mahdi Aghaie1225
- Molecular dynamics study of ionic diffusion and the FLiNaK salt melt structure
A.Y. Galashev1324
- Geochemical and S isotopic studies of pollutant evolution in groundwater after acid in situ leaching in a uranium mine area in Xinjiang
Zhenzhong Liu, Kaixuan Tan, Chunguang Li, Yongmei Li, Chong Zhang, Jing Song, and Longcheng Liu1476
- A comprehensive review on clay swelling and illitization of smectite in natural subsurface formations and engineered barrier systems
Lotanna Ohazuruike and Kyung Jae Lee1495
- High-efficiency deep geological repository system for spent nuclear fuel in Korea with optimized decay heat in a disposal canister and increased thermal limit of bentonite
Jongyoul Lee, Kwangil Kim, Inyoung Kim, Heejae Ju, Jongtae Jeong, Changsoo Lee, Jung-Woo Kim, and Dongkeun Cho1540

Nuclear Fuel and Reactor Materials

- Phase analysis of simulated nuclear fuel debris synthesized using UO_2 , Zr, and stainless steel and leaching behavior of the fission products and matrix elements
Ryutaro Tonna, Takayuki Sasaki, Yuji Kodama, Taishi Kobayashi, Daisuke Akiyama, Akira Kirishima, Nobuaki Sato, Yuta Kumagai, Ryoji Kusaka, and Masayuki Watanabe1300
- Impedance investigation of the surface film formed on aluminum alloy exposed to nuclear reactor emergency core coolant
Junlin Huang, Derek Lister, Xiaoliang Zhu, Shunsuke Uchida, and Qinglan Xu1518

Nuclear Policy, Economics, and Human Resource Development

- Techno-economic assessment of a very small modular reactor (vSMR): A case study for the LINE city in Saudi Arabia
Salah Ud-Din Khan and Rawaiz Khan1244
- Assessment of public knowledge, perception, and acceptance of nuclear power in Bangladesh
Md Iqbal Hosan, Md Jafor Dewan, Md Hossain Sahadath, Debasish Roy, and Drupada Roy1410

Nuclear Physics, Fusion, and Laser Technology

- Beam position measurement system at HIRFL-CSRm
Min Li, Guoqing Xiao, Ruishi Mao, Tiecheng Zhao, Youjin Yuan, Weilong Li, Kai Zhou, Xincan Kang, Peng Li, and Juan Li1332

Contents

Nuclear Structural Analysis /Plant Management & Maintenance

- Monitoring in a reinforced concrete structure for storing low and intermediate level radioactive waste.
Lessons learnt after 25 years
Nuria Rebolledo, Julio Torres, Servando Chinchón-Payá, Javier Sánchez, Sylvia de Gregorio, Manuel Ordóñez,
and Inmaculada López1199
- Approximate residual stress and plastic strain profiles for laser-peened alloy 600 surfaces
Eui-Kyun Park, Hyun-Jae Lee, Ju-Hee Kim, and Yun-Jae Kim1250
- Experimental and numerical investigation on the pressure pulsation in reactor coolant pumps under
different inflow conditions
Song Huang, Yu Song, Junlian Yin, Rui Xu, and Dezhong Wang1310
- Structural integrity assessment procedure of PCSG unit block using homogenization method
Gyogeun Youn, Wanjae Jang, Youngjae Jeon, Kang-Heon Lee, Gyu Mahn Lee, Jae-Seon Lee, and
Seongmin Chang1365
- Performance evaluation of plasma nitrided 316L stainless steel during long term high temperature
sodium exposure
Akash Singh, R. Thirumurugesan, S. Krishnakumar, Revati Rani, S. Chandramouli, P. Parameswaran, and
R. Mythili.....1468
- Cavitation state identification of centrifugal pump based on CEEMD-DRSN
Cui Dai, Siyuan Hu, Yuhang Zhang, Zeyu Chen, and Liang Dong1507

Nuclear Safety

- Sealing design optimization of nuclear pressure relief valves based on the polynomial chaos expansion
surrogate model
Chaoyong Zong, Maolin Shi, Qingye Li, Tianhang Xue, Xueguan Song, Xiaofeng Li, and Dianjing Chen1382
- The effect of the number of subintervals upon the quantification of the seismic probabilistic safety
assessment of a nuclear power plant
Ji Suk Kim and Man Cheol Kim1420
- Measurement of nuclear fuel assembly's bow from visual inspection's video record
Dušan Plašienka, Jaroslav Knotek, Marcin Kopeć, Martina Malá, and Jan Blažek.....1485
- Numerical study to reproduce a real cable tray fire event in a nuclear power plant
Jaiho Lee, Byeongjun Kim, Yong Hun Jung, Sangkyu Lee, and Weon Gyu Shin1571

Radiation Application

- Radiation dosimetry of ^{89}Zr labeled antibody estimated using the MIRD method and MCNP code
Saeideh Izadi Yazdi, Mahdi Sadeghi, Elham Saeedzadeh, and Mostafa Jalilifar.....1265
- New Monte-Carlo based simulation program suitable for low-energy ions irradiation in pure materials
Ghadeer H. Al-Malkawi, Al-Montaser Bellah A. Al-Ajlony, Khaled F. Al-Shboul, and Ahmed Hassanein1287
- Feasibility study of using triple-energy CT images for improving stopping power estimation
Yejin Kim, Jin Sung Kim, and Seungryong Cho1342

Contents

Radiation protection

- Shielding analyses supporting the Lithium loop design and safety assessments in IFMIF-DONES
Gediminas Stankunas, Yuefeng Qiu, Francesco Saverio Nitti, and Juan Carlos Marugán1210
- Correlation between the concentration of TeO_2 and the radiation shielding properties in the TeO_2 - MoO_3 - V_2O_5 glass system
Y. Al-Hadeethi and M.I. Sayyed1218
- Acute oral toxicity and bioavailability of uranium and thorium in contaminated soil
Nur Shahidah Abdul Rashid, Wooyong Um, Ibrahim Ijang, Kok Siong Khoo, Bhupendra Kumar Singh, Nurul Syiffa Mahzan, Syazwani Mohd Fadzil, Nur Syamimi Diyana Rodzi, and Aina Shafinas Mohamad Nasir1460
- Impacts of halloysite clay nanoparticles on the structural and γ -ray shielding properties of the epoxy resin
K.G. Mahmoud, M.I. Sayyed, S. Hashim, Aljawhara H. Almuqrin, and Abu El-Soad A.M1585

Reactor Physics

- Calculation of thermal neutron scattering data of MgF_2 and its effect on beam shaping assembly for BNCT
Jiaqi Hu, Zhaopeng Qiao, Lunhe Fan, Yongqiang Tang, Liangzhi Cao, Tiejun Zu, Qingming He, Zhifeng Li, and Sheng Wang1280
- Convergence study of traditional 2D/1D coupling method for k-eigenvalue neutron transport problems with Fourier analysis
Boran Kong, Kaijie Zhu, Han Zhang, Chen Hao, Jiong Guo, and Fu Li1350
- A hybrid neutronics method with novel fission diffusion synthetic acceleration for criticality calculations
Jiahao Chen, Jason Hou, and Kostadin Ivanov1428
- Study on an open fuel cycle of IVG.1M research reactor operating with LEU-fuel
Ruslan A. Irkimbekov, Artur S. Surayev, Galina A. Vityuk, Olzhas M. Zhanbolatov, Zamanbek B. Kozhabaev, Sergey V. Bedenko, Nima Ghal-Eh, and Alexander D. Vurim1439
- Establishment of DeCART/MIG stochastic sampling code system and Application to UAM and BEAVRS benchmarks
Ho Jin Park and Jin Young Cho1563

Thermal Hydraulics

- Study on three-dimensional numerical simulation of shell and tube heat exchanger of the surface ship under marine conditions
Yi Liao, Qi Cai, Shaopeng He, Mingjun Wang, Hongguang Xiao, Zili Gong, Cong Wang, Zhen Jia, Tangtao Feng, and Suizheng Qiu1233
- Experimental consideration for contact angle and force acting on bubble under nucleate pool boiling
Ji-Hwan Park, Il Seouk Park, and Daeseong Jo1269
- Assessment of CUPID code used for condensation heat transfer analysis under steam-air mixture conditions
Ji-Hwan Hwang, Jungjin Bang, and Dong-Wook Jerng1400

Contents

BEPU analysis of a CANDU LBLOCA RD-14M experiment using RELAP/SCDAPSIM
A.K. Trivedi and D.R. Novog1448

Comparative study of CFD and 3D thermal-hydraulic system codes in predicting natural convection and thermal stratification phenomena in an experimental facility
Audrius Graževičius and Anis Bousbia-Salah1555
