

Contents

Nuclear I&C

- Multi-objective path planning for mobile robot in nuclear accident environment based on improved ant colony optimization with modified A*
De Zhang, Run Luo, Ye-bo Yin, and Shu-liang Zou1838
- Reliability analysis of nuclear safety-class DCS based on T-S fuzzy fault tree and Bayesian network
Xu Zhang, Zhiguang Deng, Yifan Jian, Qichang Huang, Hao Peng, and Quan Ma1901

Nuclear Fuel Cycle and Radioactive Waste Management

- Dissolution of synthetic U-DBP and corrosion of stainless steel by dissolution schemes
Guanghui Wang, Yaorui Li, Mingjian He, Meng Zhang, Yang Gao, Hui He, and Caishan Jiao1644
- Evaluation of dissolution characteristics of magnetite in an inorganic acidic solution for the PHWR system decontamination
Ayantika Banerjee, Wangkyu Choi, Byung-Seon Choi, Sangyoon Park, and Seon-Byeong Kim1892

Nuclear Fuel and Reactor Materials

- Interaction study of molten uranium with multilayer SiC/Y₂O₃ and Mo/Y₂O₃ coated graphite
S.K. Sharma, M.T. Saify, Sanjib Majumdar, and Palash K. Mollick1855
- Statistical analysis of S-N type environmental fatigue data of Ni-base alloy welds using weibull distribution
Jae Phil Park, Junhyuk Ham, Subhasish Mohanty, Dayu Fajrul Falaakh, Ji Hyun Kim, and Chi Bum Bahn1924

Nuclear Policy, Economics, and Human Resource Development

- Asymmetric linkages between nuclear energy and environmental quality: Evidence from Top-10 nuclear energy consumer countries
Jinglei Zhang, Sajid Ali, and Lei Ping1878

Nuclear Structural Analysis /Plant Management & Maintenance

- Seismic performance evaluation of reactor containment building considering effects of concrete material models and prestressing forces
Bidhek Thusa, Duy-Duan Nguyen, Md Samdani Azad, and Tae-Hyung Lee1567
- Seismic analysis of a steam generator for Gyeongju and Pohang earthquakes
Myung Jo Jhung, Youngin Choi, Changsik Oh, Gangsig Shin, and Chan Il Park1577
- Experimental validation of ASME strain-based seismic assessment methods using piping elbow test data
Jong-Min Lee, Jae-Yoon Kim, Hyun-Seok Song, Yun-Jae Kim, and Jin-Weon Kim1616

Nuclear Safety

- Plant-scale experiments of an air inflow accident under sub-atmospheric pressure by pipe break in an open-pool type research reactor
Donkoan Hwang, Nakjun Choi, WooHyun Jung, Taeil Kim, Yohan Lee, and HangJin Jo1604
- Long-term prediction of safety parameters with uncertainty estimation in emergency situations at nuclear power plants
Hyojin Kim and Jonghyun Kim1630

An International Journal of the Korean Nuclear Society

NUCLEAR ENGINEERING AND TECHNOLOGY

Volume 55, Number 5, May 2023

Contents

Analysis of LBLOCA of APR1400 with 3D RPV model using TRACE
Yunseok Lee, Youngjae Lee, Ae Ju Chung, and Taewan Kim.....1651

An integrated risk-informed safety classification for unique research reactors
Jacek Kałowski and Karol Kowal.....1814

Radiation Application

Experimental study of noise level optimization in brain single-photon emission computed tomography images using non-local means approach with various reconstruction methods
Seong-Hyeon Kang, Seungwan Lee, and Youngjin Lee1527

A 30 MeV-cyclotron-based quasi-monoenergetic neutron source
Kuo-Yuan Chu, Weng-Sheng Kuo, How-Ming Lee, and Yiin-Kuen Fuh1559

Optimization of image reconstruction method for dual-particle time-encode imager through adaptive response correction
Dong Zhao, Wenbao Jia, Daqian Hei, Can Cheng, Wei Cheng, Xuwen Liang, and Ji Li.....1587

Simulating the impact of iodine as a contrast substance to enhance radiation to the tumor in a brain x-rayphototherapy
M. Orabi1671

Comparative study of the pulse shape discrimination (PSD) performance of pixelated stilbene and plastic scintillator (EJ-276) arrays for a coded-aperture-based hand-held dual-particle imager
Jihwan Boo and Manhee Jeong1677

Identification of Pb–Zn ore under the condition of low count rate detection of slim hole based on PGNA technology
Haolong Huang, Pingkun Cai, Wenbao Jia, and Yan Zhang.....1708

Positional correction of a 3D position-sensitive virtual Frisch-grid CZT detector for gamma spectroscopy and imaging based on a theoretical assumption
Younghak Kim, Kichang Shin, Aleksey Bolotnikov, and Wonho Lee1718

Conceptual design of hybrid target for molybdenum-99 production based on heavywater
Ali Torkamani, Ali Taghibi Khotbehsara, Faezeh Rahmani, Alexander Khelvas, Alexander Bugaev, and Farshad Ghasemi1863

Nano Yttrium-90 and Rhenium-188 production through medium medical cyclotron and research reactor for therapeutic usages: A Simulation study
Abdollah Khorshidi1871

Radiation Protection

X-ray/gamma radiation shielding properties of Aluminium-Barium–Zinc Oxide nanoparticles synthesized via low temperature solution combustion method
K.V. Sathish, K.N. Sridhar, L. Seenappa, H.C. Manjunatha, Y.S. Vidya, B. Chinnappa Reddy, S. Manjunatha, A.N. Santhosh, R. Munirathnam, Alfred Cecil Raj, P.S. Damodara Gupta, and B.M. Sankarshan.....1519

Gd effect on microstructure and properties of the Modified-690 alloy for function structure integrated thermal neutron shielding
Cheng Zhang, Jie Pan, Zixie Wang, Zhaoyu Wu, Qiliang Mei, Qianxue Ding, Jing Gao, and Xueshan Xiao.....1541

Contents

A closer look at the structure and gamma-ray shielding properties of newly designed boro -tellurite glasses reinforced by bismuth (III) oxide <i>Hamam Abdurabu Thabit, Abd Khamim Ismail, N.N. Yusof, M.I. Sayyed, K.G. Mahmoud, I. Abdullahi, and S. Hashim</i>	1734
Assessment of occupational radiation exposure of NORM scales residues from oil and gas production <i>EL Hadji Mamadou Fall, Abderrazak Nechaf, Modou Niang, Nadia Rabia, Fatou Ndoeye, and Ndeye Arame Boye Faye</i>	1757
Micro gadolinium oxide dispersed flexible composites developed for the shielding of thermal neutron/ gamma rays <i>Boyu Wang, Xiaolin Guo, Lin Yuan, Qinglong Fang, Xiaojuan Wang, Tianyi Qiu, Caifeng Lai, Qi Wang, and Yang Liu</i>	1763
Synthesis, physical, optical and radiation shielding properties of Barium-Bismuth Oxide Borate-A novel nanomaterial <i>B.M. Chandrika, Holaly Chandrashekara Shastry Manjunatha, K.N. Sridhar, M.R. Ambika, L. Seenappa, S. Manjunatha, R. Munirathnam, and A.J. Clement Lourduraj</i>	1783
Performance assessment of HEPA filter to reduce internal dose against radioactive aerosol in nuclear decommissioning <i>Hee Kwon Ku, Min-Ho Lee, Hyunjin Boo, Geun-Dong Song, Deokhee Lee, Kaphyun Yoo, and Byung Gi Park</i> ...	1830
Impacts of the calcination temperature on the structural and radiation shielding properties of the NASICON compound synthesized from zircon minerals <i>Islam G. Alhindawy, Hany Gamal, Aljawhara.H. Almuqrin, M.I. Sayyed, and K.A. Mahmoud</i>	1885
Radiological safety analysis of a newly designed spent resin mixture treatment facility during normal and abnormal operational scenarios for the safety of radiation workers <i>Jaehoon Byun, Seungbin Yoon, and Hee Reyoung Kim</i>	1935

Reactor Physics

Sorted compressive sensing for reconstruction of failed in-core detector signals <i>Gyu-ri Bae, Moon-Ghu Park, Youngchul Cho, and Jung-Uk Sohn</i>	1533
Development of transient Monte Carlo in a fissile system with β -delayed emission from individual precursors using modified open source code OpenMC(TD) <i>J. Romero-Barrientos, F. Molina, J.I. Márquez Damián, M. Zambra, P. Aguilera, F. López-Usquiano, and S. Parra</i>	1593
On the cyclic change in the dynamics of the IBR-2M pulsed reactor <i>Yu.N. Pepelyshev and Sumkhuu Davaasuren</i>	1665
Sensitivity study of parameters important to Molten Salt Reactor Safety <i>Sarah Elizabeth Creasman, Visura Pathirana, and Ondrej Chvala</i>	1687
Evaluation of neutronics parameters during RSG-GAS commissioning by using Monte Carlo code <i>Surian Pinem, Wahid Luthfi, Peng Hong Liem, and Donny Hartanto</i>	1775

Thermal Hydraulics

Large-eddy simulation on gas mixing induced by the high-buoyancy flow in the CIGMA facility <i>Satoshi Abe and Yasuteru Sibamoto</i>	1742
---	------

Contents

Platform development for multi-physics coupling and uncertainty analysis based on a unified framework <i>Guan-Hua Qian, Ren Li, Tao Yang, Xu Wang, Peng-Cheng Zhao, Ya-Nan Zhao, and Tao Yu</i>	1791
Numerical study on conjugate heat transfer in a liquid-metal-cooled pipe based on a four-equation turbulent heat transfer model <i>Xian-Wen Li, Xing-Kang Su, Long Gu, Xiang-Yang Wang, and Da-Jun Fan</i>	1802
Effects of decay heat and cooling condition on the reactor pool natural circulation under RVACS operation in a water 2-D slab model <i>Min Ho Lee, Dong Wook Jerng, and In Cheol Bang</i>	1821
Thermal-hydraulic 0D/3D coupling in OpenFOAM: Validation and application in nuclear installations <i>Santiago F. Corzo, Dario M. Godino, Alirio J. Sarache Piña, Norberto M. Nigro, and Damian E. Ramajo</i>	1911
Publisher's Note Publisher's note	1946
