

Contents

Nuclear I&C

- Portable multi-channel analyzer for embedded gamma radiation in an ARM Cortex-M7 MCU
*Ángel García-Durán, Antonio Baltazar-Raigosa, Carina Oliva Torres-Cortes, and
Claudia Angelica Marquez-Mata*.....1836
- A study on the uncertainty of setpoint for reactor trip system of NPPs considering rectangular
distributions
Youngho Jin, Jae-Yong Lee, and Oon-Pyo Zhu.....1845
- Prediction of Remaining Useful Life (RUL) of Electronic Components in the POSAFE-Q PLC Platform under
NPP Dynamic Stress Conditions
Inseok Jang and Chang Hwoi Kim.....1863
- Development of a dry mock-up system for verifying pyroprocess automation
Seungnam Yu, Dongseok Ryu, Byugsuk Park, and Jonghui Han.....1913

Nuclear Fuel Cycle and Radioactive Waste Management

- Image reconstruction algorithm for momentum dependent muon scattering tomography
JungHyun Bae, Rose Montgomery, and Stylianos Chatzidakis.....1553
- Europium-driven Alloy 709 corrosion in static FLiNaK molten salt at 700 °C
Taiqi Yin, Amanda Leong, and Jinsuo Zhang.....1738
- Development and validation of isotope prediction module for VVER spent nuclear fuel analysis
Jaerim Jang and Deokjung Lee.....1762
- Changes in physicochemical characteristics of cation exchange resins by high dose gamma irradiation
Seung Joo Lim, Wang Kyu Choi, and Mansoo Choi.....1777
- Determine the hazards of radioactive elements and radon gas manufacturing processes in an Egyptian
fertilizer factory
Soad Saad Fares.....1781
- Strain-dependent-deformation property of Gyeongju compacted bentonite buffer material for
engineered barrier system
Ivan Jeff Navea, Jebie Balagosa, Seok Yoon, and Yun Wook Choo.....1854
- Hypphae and organic acids of *Aspergillus Niger* promote uranium recovery by destroying the ore surface
and increasing the porosity and permeability of ores
*Yongdong Wang, Jinhua Wang, Dexin Ding, Guangyue Li, Jing Sun, Nan Hu, Feng Li, Jianhong Ma, Hui Zhang,
Yang Ding, and Zhongran Dai*.....1880

Nuclear Policy, Economics, and Human Resource Development

- Multi-objective optimization application for a coupled light water small modular reactor-combined heat
and power cycle (cogeneration) systems
Seong Woo Kang and Man-Sung Yim.....1654

Nuclear Physics, Fusion, and Laser Technology

- Quasi-optical design and analysis of a remote steering launcher for CFETR ECRH system
*Zhang Chao, Xiaojie Wang, Dajun Wu, Yuning Tang, Hanlin Wang, Dingzhen Li, Fukun Liu, Muquan Wu,
Peiguang Yan, Xiang Gao, and Jiangang Li*.....1619

Contents

Loading pattern optimization using simulated annealing and binary machine learning pre-screening
Ga-Hee Sim, Moon-Ghu Park, Gyu-ri Bae, and Jung-Uk Sohn1672

Production cross sections of radionuclides in the proton induced reactions on natural iron with the
proton energy of 57 MeV
Sung-Chul Yang, Sang Pil Yoon, Tae-Yung Song, and Guinyun Kim1796

Nuclear Structural Analysis /Plant Management & Maintenance

Methodology for predicting optimal friction support location to attenuate vibrational energy in piping
systems
Minseok Lee, Yong Hoon Jang, and Seunghun Baek1627

Seismic performance evaluation of fiber-reinforced prestressed concrete containments subject to
earthquake ground motions
Xiaolan Pan, Ye Sun, Zhi Zheng, Yuchen Zhai, and Lianpeng Zhang1638

A novel monitoring system for fatigue crack length of compact tensile specimen in liquid lead-bismuth
eutectic
Baoquan Xue, Jibo Tan, Xinqiang Wu, Ziyu Zhang, and Xiang Wang1887

Nuclear Safety

Study on load tracking characteristics of closed Brayton conversion liquid metal cooled space nuclear
power system
Li Ge, Huaqi Li, and Jianqiang Shan1584

A flow-directed minimal path sets method for success path planning and performance analysis
Zhanyu He, Jun Yang, and Yueming Hong1603

Relative humidity prediction of a leakage area for small RCS leakage quantification by applying the Bi-
LSTM neural networks
Sang Hyun Lee, Hye Seon Jo, and Man Gyun Na1725

Effect of inlet throttling on thermohydraulic instability in a large scale water-based RCCS: A system-level
analysis with RELAP5-3D
Zhieh Jhia Ooi, Qiuping Lv, Rui Hu, Matthew Jasica, and Darius Lisowski1902

Radiation Application

Neutron/gamma scintillation detector for status monitoring of accelerator-driven neutron source IREN
*S. Nuruyev, D. Berikov, R. Akbarov, G. Ahmadov, F. Ahmadov, A. Sadigov, M. Holik, J. Naghiyev, A. Madadzada,
and K. Udovichenko*1667

A study on the positioning of fine scintillation pixels in a positron emission tomography detector
through deep learning of simulation data
Byungdu Jo and Seung-Jae Lee1733

A comparison study between the realistic random modeling and simplified porous medium for gamma-
gamma well-logging
Fatemeh S. Rasouli1747

Contents

Secondary fragments of proton and helium ion beams in High-Density Polyethylene phantom: A Monte Carlo simulation study <i>M. Arif Efendi and Chee Keat Ying</i>	1754
Effect of gamma irradiation on the size of cellulose nanocrystals with polyethylene glycol and sodium hydroxide/Gd ₂ O ₃ nanocomposite as contrast agent in magnetic resonance imaging (MRI) <i>Fathyah Whba, Faizal Mohamed, Mohd Idzat Idris, Rawdah Whba, and Noramaliza Mohd Noor</i>	1803
Conceptional design of an adjustable moderator for BNCT based on a neutron source of 2.8 MeV proton bombarding with Li target <i>Yinan Zhu, Zuokang Lin, Haiyan Yu, Xiaohan Yu, and Zhimin Dai</i>	1813
High-radiation-exposure work in Korean pressurized water reactors <i>Changju Song, Tae Young Kong, Seongjun Kim, Jinho Son, Hwapyoung Kim, Jiung Kim, Jaeok Park, Hee Geun Kim, and Yongkwon Kim</i>	1874
Assessment of natural radioactivity in soil and olive mill pomace utilizing naI (TI) gamma-ray spectrometry and low background alpha/beta counting system <i>Amani Kraishan, Mohammad Abu Shayeb, Hafedh Belmabrouk, Ahmad Ali Husein Qwasmeh, and Muzahir Ali Baloch</i>	1925

Radiation protection

Energy build-up factors estimation for BaZr _{0.10} Ti _{0.90} O ₃ , Ba _{0.90} La _{0.10} TiO ₃ and Ba _{0.90} La _{0.10} Zr _{0.10} Ti _{0.90} O ₃ ceramics in shielding applications <i>Sarabjeet Kaur, Vidushi Karol, Pankaj Kumar, Gurpreet Kaur, Prianka Sharma, Amandeep Saroa, and Amrit Singh</i>	1822
A comprehensive evaluation of Mg-Ni based alloys radiation shielding features for nuclear protection applications <i>M.I. Sayyed, K.A. Mahmoud, Faras Q. Mohammed, and Kawa M. Kaky</i>	1830
Physical and γ -ray shielding properties of Vietnam's natural stones: An extensive experimental and theoretical study <i>Ta Van Thuong, O.L. Tashlykov, A.M. Shironina, I.P. Voronin, E.V. Kuвшinova, D.O. Pyltsova, E.I. Nazarov, and K.A. Mahmoud</i>	1932

Reactor Physics

Uncertainty analysis of UAM TMI-1 benchmark by STREAM/RAST-K <i>Jaerim Jang, Yunki Jo, and Deokjung Lee</i>	1562
Calculation of the fission products for neutron-induced fission of ²³⁵ U <i>Changqi Liu, Kai Tao, Liming Huang, Dejun E, Xiaohou Bai, and Zhanwen Ma</i>	1895

Thermal Hydraulics

Thermal-hydraulic modeling of CAREM-25 advanced small modular reactor using the porous media approach and COBRA-EN modified code <i>Saeed Zare Ganjaroodi, Maryam Fani, Ehsan Zarifi, and Salaheddine Bentridi</i>	1574
Experimental measurement of stiffness coefficient of high-temperature graphite pebble fuel elements in helium at high temperatures <i>Minghao Si, Nan Gui, Yanfei Sun, Xingtuan Yang, Jiyuan Tu, and Shengyao Jiang</i>	1679

Contents

Development of supporting platform for the fine flow characteristics of reactor core <i>Hao Qian, Guangliang Chen, Lei Li, Lixuan Zhang, Xinli Yin, Hanqi Zhang, and Shaomin Su</i>	1687
Thermal-hydraulic and load following performance analysis of a heat pipe cooled reactor <i>Guanghui Jiao, Genglei Xia, Jianjun Wang, and Minjun Peng</i>	1698
Numerical analysis on two-phase flow-induced vibrations at different flow regimes in a spiral tube <i>Guangchao Yang, Xiaofei Yu, Yixiong Zhang, Guo Chen, Shanshan Bu, Ke Zhang, and Deqi Chen</i>	1712

Corrigendum

Corrigendum to “Li ₄ SiO ₄ slurry conditions and sintering temperature for fabricating Li ₄ SiO ₄ pebbles as tritium breeder for nuclear-fusion reactors” [Nucl. Eng. Technol. 55 (2023) 2966] <i>Young ah Park, Ji Won Yoo, Yi-Hyun Park, and Young soo Yoon</i>	1941
Corrigendum to “Experiment of proof-of-principle on prompt gamma-positron emission tomography (PG-PET) system for in-vivo dose distribution verification in proton therapy” [Nucl. Eng. Technol. 55 (2023) 2018–2025] <i>Bo-Wi Cheon, Hyun Cheol Lee, Sei Hwan You, Hee Seo, Chul Hee Min, and Hyun Joon Choi</i>	1942
