

Contents

Nuclear I&C

- Dimensional synthesis of an Inspection Robot for SG tube-sheet
Kuan Zhang, Jizhuang Fan, Tian Xu, Yubin Liu, Zhenming Xing, Biying Xu, and Jie Zhao2718

Nuclear Fuel Cycle and Radioactive Waste Management

- Towards inferring reactor operations from high-level waste
Benjamin Jung, Antonio Figueroa, and Malte Götsche2704
- Laser surface cleaning of simulated radioactive contaminants in various technological environments
Maxim Cheban, Serafima Filatova, Yaroslav Kravchenko, Konstantin Scherbakov, Dmitry Mamonov, Sergey Klimentov, Maxim Savinov, and Maxim Chichkov2775

Nuclear Fuel and Reactor Materials

- Enhancement of FeCrAl-ODS steels through optimised SPS parameters and addition of novel nano-oxide formers
A. Meza, E. Macía, M. Serrano, C. Merten, U. Gaitzsch, T. Weißgärber, and M. Campos2584
- Neutronic optimization of thorium-based fuel configurations for minimizing slightly used nuclear fuel and radiotoxicity in small modular reactors
Nur Anis Zulaikha Kamarudin, Aznan Fazli Ismail, Mohamad Hairie Rabir, and Khoo Kok Siong2641

Nuclear Policy, Economics, and Human Resource Development

- Nuclear energy, economic growth and CO₂ emissions in Pakistan: Evidence from extended STRIPAT model
Muhammad Yousaf Raza and Songlin Tang2480
- Estimating North Korea's nuclear capabilities: Insights from a study on tritium production in a 5MWe graphite-moderated reactor
Sungmin Yang, Manseok Lee, Danwoo Ko, Gyunyoung Heo, Changwoo Kang, and Seung Min Woo2666
- Does the nuclear engineering field perform worse in utilizing women? Evidence from South Korea
Jihye Kam, Sungyeol Choi, and Soohyung Lee2676
- Balancing the nuclear equation: Climate policy uncertainty and budgetary dynamics
Chang Li, Sajid Ali, Raima Nazar, and Muhammad Saeed Meo2850
- The volcanic aspect on determining Site of nuclear power plant in Indonesia: Gap analysis between standard and regulations
Widjanarko, Budi Santoso, Rismiyanto, Kurnia Anzhar, Joko Waluyo, Gustini H. Sayid, Khusnul Khotimah, Nicholas Bertony Saputra, Agus Teguh Pranoto, Hadi Suntoko, Siti Alimah, Sriyana, Roni Cahya Ciputra, and Alfitri Meliana2875

Nuclear Physics, Fusion, and Laser Technology

- Monte Carlo simulation of spatial resolution of lens-coupled LYSO scintillator for intense pulsed gamma-ray imaging system with large field of view
Guoguang Li, Liang Sheng, Baojun Duan, Yang Li, Dongwei Hei, and Qingzi Xing2650

Nuclear Structural Analysis /Plant Management & Maintenance

- Experimental study on vibration projection of seawater circulation pumps in nuclear power plant
Lin Bin, Huang Qian, Zhang Rongyong, Zhu Rongsheng, Fu Qiang, and Wang Xiuli2576

Contents

Investigations on seismic performance of nuclear power plants equipped with an optimal BIS-TMDI considering FSI effects Shuaijun Zhang, Gangling Hou, Chengyu Yang, Zhihua Yue, Yuzhu Wang, Min He, Lele Sun, and Xuesong Cai	2595
Failure simulation of nuclear pressure vessel under LBLOCA scenarios Eui-Kyun Park, Jun-Won Park, Yun-Jae Kim, Kukhee Lim, and Eung-Soo Kim	2859

Nuclear Safety

Development of GPU-Paralleled multi-resolution techniques for Lagrangian-based CFD code in nuclear thermal-hydraulics and safety Do Hyun Kim, Yelyn Ahn, and Eung Soo Kim	2498
Development of an on-demand flooding safety system achieving long-term inexhaustible cooling of small modular reactors employing metal containment vessel Jae Hyung Park, Jihun Im, Hyo Jun An, Yonghee Kim, Jeong Ik Lee, and Sung Joong Kim	2534
Waste to shield: Tailoring cordierite/mullite/zircon composites for radiation protection through controlled sintering and Y_2O_3 addition Celal Avcioglu and Recep Artir	2767

Radiation Application

Geant 4 Monte Carlo simulation for I-125 brachytherapy Jie Liu, M.E. Medhat, and A.M.M. Elsayed	2516
Design of an integrated multiple-single-channel analyzer Jie Yang, Xiaofei Gu, Shuxiang Lu, and Guoheng Zheng	2557
Effects of reflector, surface treatment, and length of scintillation crystal on the performance of TOF-DOI PET detector with dual-ended readout Jin Ho Jung, Yong Choi, Johyeon Yun, Jiwoong Jung, and Sangwon Lee	2633
Design of proton-beam degrader for high-purity ^{89}Zr production Hyunjin Lee, Sangbong Lee, Daeseong Choi, Gyoseong Jeong, and Hee Seo	2683
A counting-time optimization method for artificial neural network (ANN) based gamma-ray spectroscopy Moonhyung Cho, Jisung Hwang, Sangho Lee, Kilyoung Ko, Wonku Kim, and Gyuseong Cho	2690
Generation of LiF(Mg,Cu,Na,Si) thermoluminescent crystal and evaluation of dose response and sensitivity Abdollah Khorshidi	2790
Development of a dual-mode energy-resolved neutron imaging detector: High spatial resolution and large field of view Wenqin Yang, Jianrong Zhou, Jianqing Yang, Xingfen Jiang, Jinhao Tan, Lin Zhu, Xiaojuan Zhou, Yuanguang Xia, Li Yu, Xiuku Wang, Haiyun Teng, Jiajie Li, Yongxiang Qiu, Peixun Shen, Songlin Wang, Yadong Wei, Yushou Song, Jian Zhuang, Yubin Zhao, Junrong Zhang, Zhijia Sun, and Yuanbo Chen	2799
Online analysis of iron ore slurry using PGNA technology with artificial neural network Haolong Huang, Pingkun Cai, Xuwen Liang, and Wenbao Jia	2835

Contents

Radiation protection

Experimental study of the radiation shielding characteristics of new PbO–Na ₂ O–B ₂ O ₃ –BaO glasses M.I. Sayyed, U. Rilwan, K.A. Mahmoud, and Mohamed Elsafi.....	2437
Advanced radiation shielding materials: PbO ₂ -doped zirconia ceramics synthesized through innovative sol-gel method Islam G. Alhindawy, Mohammad W. Marashdeh, Mamduh J. Aljaafreh, Mohannad Al-Hmoud, Sitah Alanazi, and K. Mahmoud.....	2444
Assessment of soil density and distribution coefficient of Cs-137 for deriving DCGLs in Korea research reactor unit 1 and 2 Geun-Ho Kim, Ilgook Kim, and Kwang Pyo Kim	2452
Impacts of sintering temperature on the mechanical properties and gamma ray protection capacity of clay bricks Aljawhara H. Almuqrin, K.A. Mahmoud, M.I. Sayyed, and H. Al-Ghamdi.....	2489
Development of a flexible composite based on vulcanized silicon casting with bismuth oxide and characterization of its radiation shielding effectiveness in diagnostic X-ray energy range and medium gamma-ray energies İbrahim Demirel and Haluk Yücel.....	2570
Improvement of doses rate prediction using the Kalman Filter-based algorithm and effective decay constant correction Cheol-Woo Lee, Hyo Jun Jeong, Sol Jeong, and Moon Hee Han	2659
Comparison of the standards for absorbed dose to water of the IAEA and the KRISS, Korea in accelerator photon beams L. Czap, I.J. Kim, J.I. Park, C.-Y. Yi, Y. Kim, and Z. Msimang.....	2698
Influence of various metal oxides (PbO, Fe ₂ O ₃ , MgO, and Al ₂ O ₃) on the mechanical properties and γ -ray attenuation performance of zinc barium borate glasses Aljawhara H. Almuqrin, K.A. Mahmoud, U. Rilwan, and M.I. Sayyed.....	2711
Radioiodine internal dose coefficients specific for Koreans Tae-Eun Kwon, Yoonsun Chung, and Choonsik Lee	2732
The influence of Ni ion addition on the microstructure and gamma ray shielding ability of ferromagnetic CuFe ₂ O ₄ ceramic material Mohammad W. Marashdeh, Fawzy H. Sallam, Ahmed M. Abd El-Aziz, Mohamed I. Elkhatib, Sitah f. Alanazi, Mamduh J. Aljaafreh, Mohannad Al-Hmoud, and K.A. Mahmoud.....	2740
Development and evaluation of modified lead gloves to reduce hand radiation dose during interventional radiological procedures Hyun-Jun Park, Byungdu Jo, and Seung-Jae Lee	2781
A comparative study of different radial basis function interpolation algorithms in the reconstruction and path planning of γ radiation fields Yulong Zhang, Jinjia Cao, Biao Zhang, Xiaochang Zheng, and Wei Chen	2806
New polyester composites synthesized with additions of different sized ZnO to study their shielding efficiency M. Elsafi, M.I. Sayyed, and Aljawhara H. Almuqrin.....	2821

Contents

Recycling and characterization of bone incorporated with concrete for gamma-radiation shielding applications U. Rilwan, G.M. Aliyu, S.F. Olukotun, M.M. Idris, A.A. Mundi, S. Bello, I. Umar, A. El-Taher, K.A. Mahmoud, and M.I. sayyed.....	2828
Characterization of glasses composed of PbO, ZnO, MgO, and B ₂ O ₃ in terms of their structural, optical, and gamma ray shielding properties Aljawhara H. Almuqrin, M.I. Sayyed, Ashok Kumar, and U. Rilwan	2842
Reactor Physics	
Vibrational enhancement of evolutionary monochromatic neutron transport Nassar H.S. Haidar	2563
Neutronic examination of the U-Mo accident tolerant fuel for VVER-1200 reactors Semra Daydas and Ali Tiftikci	2625
The methods of CADIS-NEE and CADIS-DXTRAN in NECP-MCX and their applications Qingming He, Zhanpeng Huang, Liangzhi Cao, and Hongchun Wu	2748
Performance of different absorber materials and move-in/out strategies for the control rod in small rod-controlled pressurized water reactor: A study based on KLT-40 model Zhiqiang Wu, Jinsen Xie, Pengyu Chen, Yingjie Xiao, Zining Ni, Tao Liu, Nianbiao Deng, Aikou Sun, and Tao Yu.....	2756
Thermal Hydraulics	
Experimental study of turbulent flow in a scaled RPV model by PIV technology Luguo Liu, Wenhai Qu, Yu Liu, Jinbiao Xiong, Songwei Li, and Guangming Jiang	2458
Enhancement of critical heat flux with additive-manufactured heat-transfer surface Tatsuya Kano, Rintaro Ono, and Masahiro Furuya.....	2474
Boundary layer measurements for validating CFD condensation model and analysis based on heat and mass transfer analogy in laminar flow condition Shu Soma, Masahiro Ishigaki, Satoshi Abe, and Yasuteru Sibamoto	2524
The effect of the nozzle exit geometry on the flow characteristics of the free condensing jet Jaewon Myeong, Seungwan Kim, Dehee Kim, Jongtae Kim, and Weon Gyu Shin	2545
Operating condition optimization of liquid metal heat pipe using deep learning based genetic algorithm: Heat transfer performance Ik Jae Jin, Dong Hun Lee, and In Cheol Bang	2610
Modeling and simulation of air-water upward annular flow characteristics in a vertical tube using CFD Anadi Mondal and Subash L Sharma	2881
