

Contents

Nuclear I&C

- Gamma scintigraphy in sensing drug delivery systems
Arif Nadaf, Umme Jiba, Arshi Chaudhary, Nazeer Hasan, Mohammad Adil, Yousuf Hussain Mohammed, Prashant Kesharwani, Gaurav Kumar jain, and Farhan Jalees Ahmad.....4423

Nuclear Fuel Cycle and Radioactive Waste Management

- Distribution coefficients Kd of cobalt ions in soil samples of Anarak near-surface radioactive waste repository studied by batch and three different column methods
Maliheh Esmaeilboosjin, Marzieh Aminisisakht, Mohadeseh Poursharifiravari, Mojtaba Dara, and Mohammad Samadfam4056
- Towards automatic inspection of nuclear fuel elements in spent fuel pools: Audio analysis
Sergio Segovia, Ángel Ramos, David Izard, and Doroteo T. Toledano4062
- Electrochemical method for determining the solubility of impurities in lead-bismuth eutectic using molten salt electrolytes
Taiqi Yin, Yongcheng Zhang, Lei Zhang, Tao Bo, Xiaoli Tan, and Weiqun Shi.....4169
- Hydrodynamics control for the well field of in-situ leaching of uranium
Yongmei Li, Chong Zhang, Zhipeng Tang, Chunguang Li, Zhenzhong Liu, Kaixuan Tan, and Longcheng Liu4176
- Seismic analysis of free-standing spent-fuel dry storage cask considering soil-concrete pad-cask interaction
Seungpil Kim and Sang Soon Cho4446
- GDSA framework, a computational framework for complex modeling problems in radioactive waste management
Teresa Portone, Aubrey Eckert, Eduardo Basurto, Ernest Friedman-Hill, and Laura Swiler.....4463

Nuclear Fuel and Reactor Materials

- Swelling at high radiation damage levels of 120 and 240 dpa in 3.5 MeV self-ion irradiated ferritic/martensitic steels
Myeongkyu Lee, Geon Kim, and Sangjoon Ahn.....4115
- Estimation of residual stress in dissimilar metals welding using deep fuzzy neural networks with rule-dropout
Ji Hun Park and Man Gyun Na4149
- Fission accelerated steady-state post irradiation examinations - Part II
Sobhan Patnaik, Geoffrey L. Beausoleil II, and Luca Capriotti4158
- Estimating spent fuel burnup with Neutron measurements: A Practical Rule of Thumb Equation
Kwangheon Park, Sohee Cha, Jinhyun Sung, Yunsik Kim, Younghwan Choi, Moonoh Kim, Heymin Park, and Yangsoo Song4219
- Evaluation of influence of dissolved oxygen on corrosion behaviors of FeCrW model alloys in 360 °C water
Jun Yeong Jo, Chi Bum Bahn, and Hwasung Yeom.....4404

Nuclear Policy, Economics, and Human Resource Development

- How do nuclear energy and stringent environmental policies contribute to achieving sustainable development targets?
ShiYong Zheng, Hua Liu, Weili Guan, Biqing Li, and Sana Ullah.....3983

Contents

Nuclear Physics, Fusion, Laser, and Accelerator Technology

- Manipulation and diagnosis of femtosecond relativistic electron bunch using terahertz-driven resonators
Yang Xu, Yifang Song, Cheng-Ying Tsai, Jian Wang, Zhengzheng Liu, Kuanjun Fan, Jinfeng Yang, and Oleg Meshkov4237

Structural Integrity Analysis and Plant Management & Maintenance

- Comparative study on the performance of butt fusion-welding processes for nuclear safety class large-diameter thick-walled PE pipes
Zhenchao Wang, Bin Wang, Aimin Xiang, Di Jiao, Fa Yu, Qiuju Zhang, and Xiaoying Zhao4184
- Evaluation of effective cross-area of reinforced concrete wall considering chloride diffusion using ANN
Hyeon-Keun Yang and Jun-Hee Park4254
- The application study of preventive maintenance during normal operation for APR1400 nuclear power plants considering risk
Jung-Wun Kim, Youngju Lee, and Weon Gyu Shin4327
- Research on accurate morphology predictive control of CFETR multi-purpose overload robot
Congju Zuo, Yong Cheng, Hongtao Pan, Guodong Qin, Pucheng Zhou, Liang Xia, Huan Wang, Ruijuan Zhao, Yongqiang Lv, Xiaoyan Qin, Weihua Wang, and Qingxi Yang4412
- Nonlinear Model Predictive Control (NMPC) based shared autonomy for bilateral teleoperation in CFETR Remote Handling
Jun Zhang, Xuanchen Zhang, Yong Cheng, Yang Cheng, Qiong Zhang, and Kun Lu4437

Nuclear Safety

- Numerical simulation on in-vessel molten corium behavior with external vessel cooling using smoothed particle hydrodynamics
Tae Hoon Lee, Yeon-Gun Lee, Kukhee Lim, Yun-Jae Kim, So-Hyun Park, and Eung Soo Kim4018
- Korean perspective for integrated deterministic-probabilistic safety assessment and its synergetic strategy with conventional methods
Gyunyoung Heo and Dohun Kwon4031
- Experimental study on the retention of aerosol particles through concrete cracks under high Reynolds number flow
Hui Wang, Zhongning Sun, Haifeng Gu, Ji Xing, Xiaohui Sun, Xueyao Shi, and Bin Zhao4068
- A time-reliability correlation for estimating the diagnosis error probability of a nuclear power plant with up-to-date Human-Machine interfaces
Wondea Jung, Yochan Kim, and Jinkyun Park4087
- Severe accident analysis induced by secondary pipeline break in a small modular PWR
Xiaolong Bi, Jie Chen, Peiwei Sun, and Xinyu Wei4263
- A sensitivity study on the PDFs treating uncertainties in severe accidents for pressurized heavy water reactors
Roxana-Mihaela Nistor-Vlad, Daniel Dupleac, and Andrei-Răzvan Budu-Stănilă4280
- A hybrid approach of partially applying BDD for seismic PSA quantification
Sang Hoon Han4289

Contents

Multi-unit PSA based risk evaluation framework for utilizing cross-tie systems for nuclear power plants <i>Jong Woo Park, Ho-gon Lim, Jae Young Yoon, and Seong Woo Kang</i>	4296
---	------

Radiation Application

CdZnTe semiconductor-based dual imager combining collimatorless and Compton imaging: Monte Carlo simulation <i>Younghak Kim and Wonho Lee</i>	3993
Evaluation of radioactivity and radiological parameters in soil samples in Isparta, Türkiye <i>Mehmet Ertan Kürkçüoğlu, Fatih Çağlar Kahraman, Serdar Dizman, and Gülçin Bilgici Cengiz</i>	4007
The effect of methyl yellow concentrations on the optical properties of polyvinyl chloride-methyl yellow film as a radiation dosimeter <i>Muhamad Yasin Yunus, Farah Nurlidar, Santoso Soekirno, Rizka Fitriana, Marrisa Arlinkha Ega Putri, Arif Rachmanto, and Adam Tirta Kusuma</i>	4097
Noise reduction in low-dose positron emission tomography with adaptive parameter estimation in sinogram domain <i>Kyu Bom Kim, Yeonkyeong Kim, Kyuseok Kim, and Su Hwan Lee</i>	4127
A method to obtain radioactivity of non- γ nuclides by ^{60}Co based on Monte Carlo simulations <i>Yingbo Shi, Yulin Xiang, Rongbo Su, Bitao Hu, Shaohua Sun, and Zuoye Liu</i>	4134
Research on image data filtering methods for extreme environments after the nuclear leak accident <i>Minglei Zhu, Xiangkun Wu, Jun Qi, Yunlong Teng, Jinmao Jiang, and Dawei Gong</i>	4227
Rotating slit X-ray backscatter imaging <i>Krzysztof Kacperski, Jan Klimaszewski, Tymoteusz Kosiński, and Sławomir Wronka</i>	4247
Innovative projection acquisition algorithm for optimizing portable LNDCT in oil and gas pipeline imaging <i>Mostafa Kabir, Hossein Afarideh, Mitra Ghergherehchi, and Jong-Seo Chai</i>	4355
Start-to-end modeling and transmission efficiency optimization for a cyclotron-based proton therapy beamline <i>Yu Chen, Bin Qin, Xu Liu, Wei Wang, and Yicheng Liao</i>	4365
Application of wavelet transform in anti-Compton phoswich detector for gamma spectrum <i>Changqi Liu, Kai Tao, Jinqiu Peng, Liming Huang, Dejun E, Weimin Li, Xiaohou Bai, and Zhanwen Ma</i>	4390
Passivation mechanism and long-term stability: Insights from SEM-EDS analysis of passivated CdZnTeSe crystal <i>Jiwon Seo, Jangwon Byun, Kihyun Kim, Younghak Kim, Yonghoon Kim, and Beomjun Park</i>	4455

Radiation protection

Comparative analysis of TiO_2 , Fe_2O_3 , CaO and CuO in borate based glasses for gamma ray shielding <i>Heba Jamal Alasali, Ü. Rilwan, K.A. Mahmoud, Taha A. Hanafy, and M.I. Sayyed</i>	4050
Superiority of micro/nano tungsten carbide reinforced poly-methyl methacrylate composites in shielding gamma radiation <i>Ahmed M. El-Khatib, Mahmoud T. Alabsy, Alaa Y. El-Khatib, Mirvat F. Dib, and Mahmoud I. Abbas</i>	4103
Natural radioactivity, mineralogy and hazard assessment of syenogranites (ornamental stones) using a statistical approach <i>Sherif A. Taalab, Ahmed M. Ismail, W.M. El Maadawy, Kamal Abdelrahman, Mayeen Uddin Khandaker, Ahmed K. Sakr, and Mohamed Y. Hanfi</i>	4141

Contents

Korean-specific dose coefficients for external environmental exposures: Soil contamination <i>Ji Won Choi, Yumi Lee, Bangho Shin, Chansoo Choi, and Yeon Soo Yeom</i>	4375
Radiological environmental impact assessment for phosphate industry in Korea <i>Byung-Min Lee, Seong Yeon Lee, Min Woo Kwak, and Kwang Pyo Kim</i>	4384

Reactor Physics

Application of automatic few-group structure optimization based on perturbation theory to VHTR cores <i>Tae Young Han and Hyun Chul Lee</i>	4042
VINUS: A neutron transport solver based on the variational nodal method for reactor core analysis <i>Zhulun Li, Xubo Ma, Longxiao Ma, Teng Zhang, and Zhirui Du</i>	4195
A study on the applicability of simplified few-group GET (Generalized Equivalence Theory) to cylindrical molten salt fast reactor <i>Sungtaek Hong, Taesuk Oh, and Yonghee Kim</i>	4207
Development of a general framework of resonance self-shielding treatment for broad-spectrum reactor lattice physics calculation <i>Jinchao Zhang, Qian Zhang, Hang Zou, Jialei Yu, Wei Cao, Shifu Wu, Shuai Qin, Qiang Zhao, and Erez Gilad</i>	4335

Thermal Hydraulics

Thermal-hydraulic phenomena and heat removal performance of a passive containment cooling system according to exit loss coefficient <i>Sun Taek Lim, Koung Moon Kim, Jun-young Kang, Taewan Kim, Dong-Wook Jerng, and Ho Seon Ahn</i>	4077
Investigation of equivalent spherical bubble diameter at high inlet velocity pool scrubbing conditions <i>Erol Bicer, Soon-Joon Hong, and Hyoung Kyu Cho</i>	4307
Development and validation of wall and interfacial friction models in LOCUST for reactor downcomer with direct vessel injection <i>Rongshuan Xu, Xinan Wang, Caihong Xu, Dongyu He, Ting Wang, and Jinggang Li</i>	4397
