

Contents

Nuclear I&C

- Performance evaluation of a nuclear facility monitoring system using multi-sensor network and artificial intelligence algorithm
Min Kyu Baek, Insoo Kang, Seongyeon Lee, Yoon Soo Chung, Jae Joon Ahn, and Yong Hyun Chung4481

Nuclear Fuel Cycle and Radioactive Waste Management

- Pore structure characterization and permeability prediction of uranium-bearing sandstone based on digital core
Sheng Zeng, Yanan Zhang, Bing Sun, Qiue Cai, Bingyong Zeng, Yuan Shen, and Xia Wen4512
- Advancing towards technology readiness: Continuous-flow electrosorption for thorium separation from rare earth processing by-products
Batari Toja Iskandar, Aznan Fazli Ismail, Eli Syafiqah Aziman, and Sahrim Ahmad4611
- CsCl enrichment during solidification of molten LiCl-KCl-CsCl salt mixture
Sujish Divakaran, Joby Joseph, Mythili Manoharan, Muralidharan Balasubramanian, and Ponraju Durairaj4716
- Sorption of U(VI) on MX-80 bentonite, illite, shale and limestone in Na-Ca-Cl saline solutions
Zhiwei Zheng, Jianan Liu, Shinya Nagasaki, and Tammy YangTianxiao4724
- Radiological hazard assessment of soil from Kasik oil refinery, Nineveh, Iraq
M.I. Sayyed, Zainab Mowafaq Maria, Zakariya Adel Hussein, Laith Ahmed Najam, Berivan F. Namq, Taha Yaseen Wais, Mostafa Yuness Abdelfatah Mostafa, and Howaida Mansour4782
- Evaluation of source terms using the BESNA code for reference spent fuels for future underground disposal system of South Korea
Kyu Jung Choi, Duy Long Ta, Shin Sung Oh, and Ser Gi Hong4804
- Application of the Analytic Hierarchy Process (AHP) method to identify the most suitable approach for managing irradiated graphite
Giambattista Guidi, Giacomo Goffo, and Anna Carmela Violante4820
- Acceleration of reduction of U_3O_8 to UO_2 by particle rearrangement in a vertically-shaken bed
Byoungjin So, Ju Ho Lee, Jae Won Lee, and Yung Zun Cho4837

Nuclear Fuel and Reactor Materials

- High-temperature material properties of type 316L stainless steel for the design of pressure boundary components subjected to 700°C coolant
Hyeong-Yeon Lee, Ki-Ean Nam, and Jaehyuk Eoh4698
- Advanced interpretation of the SPHERE irradiation experiment with neutronics and fuel performance codes
Marc Lainet, Lelio Luzzi, Alessio Magni, Davide Pizzocri, Martina Di Gennaro, Paul Van Uffelen, Arndt Schubert, Elio D'Agata, Vincenzo Romanello, Andrei Rineiski, Karl Sturm, Sander Van Til, Florence Charpin, and Alexander Fedorov4734
- Numerical investigation of SUPERFACT-1 experiment by a MOX fuel pin thermo-mechanical model
Shaowei Tang, Yi Lei, Hao Yang, Siqi Feng, Bin Zhang, and Jianqiang Shan4791
- Assessing the impact of DIONISIO-SubChanFlow code coupling in nuclear fuel performance simulations
Mauricio Exequiel Cazado, Victor Hugo Sánchez-Espinoza, and Alejandro Soba4843

Contents

Fabrication of matrix graphite with a high degree of graphitization for spherical fuel elements by using natural microcrystalline graphite fillers
Xinlei Cao, Shen Lv, Kun Xu, Xiaohui Wang, Jingxu Wang, Bing Liu, and Ke Shen4851

Nuclear Policy, Economics, and Human Resource Development

Towards achieving status of green economy in OECD countries: Articulating the role of nuclear energy, greenfield investment and environmental taxation
Yu Zhang, Syed Tauseef Hassan, and Salahuddin Khan4494

Nuclear Physics, Fusion, Laser, and Accelerator Technology

Development of brazing technologies for bonding of graphite and CuCrZr joints applying for the first wall of the EAST device
Xianke Yang, Lei Yin, Yanwei Liu, Qianqian Lin, Chongfeng Zhong, Si Zhang, and Damao Yao4487

A new Langmuir probe design to measure plasma properties and toroidal correlations on the EAST
Liuxin Li, Wei Zhang, Xinjun Zhang, Lunan Liu, Ning Yan, Sichun Qiu, Huapeng Zhang, Liangliang Li, Zhengshuyan Wang, Yuhao Jiang, Chengming Qin, and Ghassan Antar4620

New beam dynamics code for cyclotron analysis
B.-H. Oh, K.-H. Kim, G.-R. Hahn, S.H. Park, M. Chung, and S. Shin4813

Structural Integrity Analysis and Plant Management & Maintenance

Seismic performance enhancement of small modular reactors using optimal design of inerter-based vibration absorbers
Shuaijun Zhang, Xiaoyu Ji, Gangling Hou, Ding Xu, Chengyu Yang, and Xuesong Cai4628

Effects of mineral composition of aggregates on volume expansion and elastic properties evolution caused by neutron irradiation
Weiping Zhang, Hui Liu, Ying Huang, Kaixing Liao, and Yong Zhou4649

Experimental study of air leakage of reinforced concrete panel with cracks
Yousang Lee and Hong-Gun Park4755

Optimizing asset management for Structure System Components of RSG-GAS: A reliability-centric approach
Entin Hartini, Sigit Santoso, Deswandri Deswandri, Sriyono, Veronica Indriati Sri Wardhani, Endiah Puji Hastuti, Djati Hoesen Salimy, Damianus Toersiwi Sony Tjahyani, Ignatius Djoko Irianto, Sanda, and Farisy Yogatama Sulisty4905

Nuclear Safety

Development of a human reliability analysis framework for nominal human error probability estimate of the TRIGA research reactor in Thailand
Wasin Vechgama, Jinkyun Park, Saensuk Wetchagarun, Anantachai Pechrak, and Kampanart Silva4578

MUPSA-based evaluation of portable equipment utilization for risk reduction in nuclear power plants: Framework and case study
Jae Young Yoon, Ho-Gon Lim, Jong Woo Park, and Seong Woo Kang4587

Contents

Image reconstruction method of gamma emission tomography based on prior-aware information and machine learning for partial-defect detection of PWR-type spent nuclear fuel <i>Hyung-Joo Choi, Jaewon Jeong, Hakjae Lee, Seong Gon Kim, Jae Joon Ahn, Hyun Cheol Lee, and Chul Hee Min</i>	4770
Performance evaluation of the SMART passive safety injection system against the SBLOCA scenario with the SMART-ITL facility <i>Hyun-Sik Park, Hwang Bae, Sung-Uk Ryu, Byong-Guk Jeon, Jin-Hwa Yang, Yoon-Gon Bang, and Sung-Jae Yi</i>	4859
Method of estimating break size in piping loop systems <i>Sheng-Dih Hwang</i>	4880

Radiation Application

Performance evaluation of Yonsei Single-photon Emission Computed Tomography (YSECT) for partial-defect inspection within PWR-type spent nuclear fuel <i>Hyung-Joo Choi, Yoon Soo Chung, Hojik Kim, Sung-Woo Kwak, Heejun Chung, Hee-Kyun Baek, Jung-ki Shin, Yong Hyun Chung, and Chul Hee Min</i>	4471
6 MV X-band linear accelerator for stereotactic body radiation therapy <i>Donghyup Ha, SeungHyun Lee, Mitra Ghergherehchi, Hyojeong Choi, Ho Namgoong, Jongchul Lee, and Jong-Seo Chai</i>	4502
Thermoluminescence response of carbon ion beam irradiated LiCaAlF_6 : Tb phosphor <i>Pooja Seth, Aayushi Jain, and Shruti Aggarwal</i>	4531
Nonlinear analysis and control with nonlinear driving terms for small-emittance storage ring <i>Bonghoon Oh, Jinjoo Ko, Seunghwan Shin, Jaehyun Kim, Jaeyu Lee, and Gyeongsu Jang</i>	4540
Cobalt(II) removal with dolomite: Use of radiotracer technique in aqueous solution <i>Oguzhan Sackiran and Ayse Nur Esen</i>	4642
Alpha spectrometry: Avoiding recoil contamination of solid state alpha detectors <i>C. Olondo, R. Idoeta, and M. Herranz</i>	4661
Rare earth elements as tracers: A study on post-wildfire effects in soil by neutron activation analysis <i>Ayse Nur Esen, Cihan Yildiz, Inga Zinicovscaia, and Sevilay Hacıyakupoglu</i>	4671
Radiation effects on multi-channel Forksheet-FET and Nanosheet-FET considering the bottom dielectric isolation scheme <i>Gunhee Choi and Jongwook Jeon</i>	4679
Feasibility study of CdMnTeSe based diagnostic X-ray detector <i>Ayun Jeong, Jiwon Seo, Gi-Hyeok Shin, Jangwon Byun, Taejoon Mo, Ahreum Park, Jeongmin Seo, Jeongho Kim, and Beomjun Park</i>	4748
Improvement in measurement of radiation based two-phase flowmeters independent of flow regime and scale thickness using ant colony optimization and GMDH <i>Abdullah Mohammad Mayet, Eugeniya Ilyinichna Gorelkina, Jamil AlShaqsı, Muneer Parayangat, John William Grimaldo Guerrero, M. Ramkumar Raja, Mohammed Abdul Muqeet, and Salman Arafath Mohammed</i>	4826
Systematic analysis for the thermal stability assessment of ^{166}Ho production using HANARO: An in silico study <i>Taeyun Kim, Bo-Young Han, Seongwoo Yang, Jaegi Lee, Gwang-Min Sun, Byung-Gun Park, and Sung-Joon Ye</i>	4914

Contents

Radiation protection

- Radiological, environmental, and structural investigations of Wadi El Markh granitic rocks, southeastern desert, Egypt
Mahmoud R. Khattab, Waheed H. Mohamed, Said A. Shetaia, Mohamed S. Ahmed, Sherif A. Taalab, Diaa A. Saadawi, Ahmed K. Sakr, Mayeen Uddin Khandaker, A.Sh.M. Elshoukrofy, and Mohamed Y. Hanfi.....4522
- Neutron attenuation performance of EPDM rubber with BN Nanoparticles/B₂O₃ composite and studying physical, thermal and mechanical properties
H.M. Eyssa, Nabila A. Maziad, Wagdy Kansouh, and Wageeh Ramadan.....4563
- Research on a novel γ -ray spectrum analysis method for low- and intermediate-level radioactive solid waste in nuclear power plants
Xiangming Cai, Hui Yang, Xiyu Yang, Yixin He, and Jian Shan.....4688
- Radiation shielding, optical, structural, morphological, and thermal features for tellurite glass ceramics
M.H.A. Mhareb, M.I. Sayyed, N. Alonizan, M.A. Almessiere, Irshad Baig, Raghad AlOtaibi, Batoul Alhaik, T. Ghrib, Taha A. Hanafy, and N. Sfina4708
- Evaluation of lithium tetra borate glass-ceramics: Structural, physical and radiation safety properties using experimental and theoretical methods
Neslihan Ekinci, Norah A.M. Alsaif, Z.Y. Khattari, Y.S. Rammah, Bunyamin Aygün, Yakup Kurucu, and Sevda Santaş.....4887
- Geochemical evaluation and hazard indices due to radioactive minerals associated with granitic areas
Sherif A. Taalab, Mohamed Y. Hanfi, Mohamed S. Ahmed, Diaa A. Saadawi, Ahmed K. Sakr, Mayeen Uddin Khandaker, and Mahmoud R. Khattab4921
- The impact of pressure rate on the physical, structural and gamma-ray shielding capabilities of novel light-weight clay bricks
Mohamed Y. Hanfi, A.M. Abu El-Soad, Nadi Mlihan Alresheedi, Sultan J. Alsufyani, and K.A. Mahmoud4938

Reactor Physics

- Numerical solution of static and spatial kinetics self-adjoint angular flux neutron transport equation
Duoyu Jiang, Peng Xu, Tianliang Hu, Xinbiao Jiang, Lipeng Wang, Lu Cao, Da Li, and Lixin Chen4551

Thermal Hydraulics

- Experimental study on the leakage behavior of aerosol particles in capillary tubes
Wang Hui, Sun Zhongning, Xing Ji, Li Yuchen, and Gu Haifeng4601
- Quantitative evaluation of uncertain parameters for thermal-hydraulic experiments based on the COSINE code
Yixuan Cheng, Hao Zhang, Meng Zhao, Lin Chen, Fanfan Zhou, and Yanhua Yang4868
- Numerical study on two-phase flow instability in multi-parallel channels of helical-coiled once-through steam generator of lead-cooled fast reactor
Guan-Hua Qian, Ya-Nan Zhao, Xu Wang, Peng-Cheng Zhao, Jin-Sen Xie, and Tao Yu4895
- Investigation of computational model for the natural circulation at dual channel facility
Marwa A. Shewita, Ebrahiem Esmail Ebrahiem, C. Allison, Moustapha Salem Mansour, Ayah E. Elshahat, and Mahmoud M. Taha.....4929
