

Contents

Nuclear I&C

- Imbalanced data fault diagnosis method for nuclear power plants based on convolutional variational autoencoding Wasserstein generative adversarial network and random forest
Jun Guo, Yulong Wang, Xiang Sun, Shiqiao Liu, and Baigang Du5055
- Experimental study on practical application of optical fiber sensor (OFS) for high-temperature system
Byeongyeon Kim, Youngwoong Kim, YunSook Lee, Ki-Ean Nam, Jung Yoon, Yong-Hoon Shin, Hyeonil Kim, Jewhan Lee, and BongWan Lee5182
- Research on magnetostrictive liquid level gauge for water level measurement of steam generator
Shuiqiang Duan, Minggang Li, Jiaming Li, Tongxi Li, Changhua Nie, Zumao Yang, and Jun Hu5422

Nuclear Fuel Cycle and Radioactive Waste Management

- Effects of electrode configuration on the current density distribution of the electrolytic reducer
Jin-Mok Hur, Sangkwon Lee, and Jae Soo Ryu4951
- Confirmation bias, information selection, and belief reinforcement about the safety/risk of nuclear spent fuel storage facilities
Daeyoun Lee, Woo J. Kim, and Young Rok Choi4975
- Optimizing spent nuclear fuel cask loading for VVER-440 fuel
M. Lovecký and J. Závorka5048
- A novel irradiation module for ANICCA fuel cycle code based on multi-task learning
Victor J. Casas-Molina, Nerea Aguilera-Gómez, Pablo Romojaro, Iván Merino-Rodríguez, and Augusto Hernández-Solis5175
- Evaluation of particle-capturing ability of a hydrogel-based surface decontamination agent using simulated nuclear fallout particles
Sung-Wook Kim, Hee-Man Yang, and Hyung-Ju Kim5386

Nuclear Fuel and Reactor Materials

- Microstructure response and sodium corrosion behavior of ferritic-martensitic steel after proton irradiation
Jeonghyeon Lee, Taeho Kim, Taeyong Kim, and Ji Hyun Kim5028

Nuclear Policy, Economics, and Human Resource Development

- Heavy metal loading effects on special nuclear material and waste of an uprated Indonesian Reaktor Daya Eksperimental
Dany Mulyana, Topan Setiadipura, and I Wayan Ngarayana5239

Nuclear Physics, Fusion, Laser, and Accelerator Technology

- Loss of power accident analysis for the HCCR blanket
Hyung Gon Jin, Suk-Kwon Kim, Sungbo Moon, and Mu-Young Ahn4947
- Measurement of production cross-sections of $^{nat}\text{Ti}(p,x)^{43}\text{K}$, $^{43,44}\text{m},^{44}\text{g},^{46}\text{g},^{47},^{48}\text{Sc}$, ^{48}V reactions up to 50 MeV
Dal-Ho Moon, Myung-Hwan Jung, Young Seok Hwang, and Sung-Chul Yang5022
- Design of the 500 MHz 2-cell superconducting cavity for the SILF
Yanbing Sun, Wei Ma, Yulin Ge, Nan Yuan, Liping Zou, Zhen Yang, and Liang Lu5068

Contents

“Two-dimensional distribution reconstruction and emittance diagnostics of proton beam phase space using tomography” <i>Jeong-Jeung Dang, Seunghyun Lee, Han-sung Kim, and Hyeok-jung Kwon</i>	5291
Leveraging physics-informed neural computing for transport simulations of nuclear fusion plasmas <i>J. Seo, I.H. Kim, and H. Nam</i>	5396

Structural Integrity Analysis and Plant Management & Maintenance

Impact of choice of fragility approaches on seismic risk quantification of nuclear power plants <i>Baris Kasapoglu, Halil Sezen, Tunc Aldemir, and Richard Denning</i>	5154
Applicability analysis of induction bending process to P91 piping of PGSFR by high-temperature fatigue test <i>Tae-Won Na, Nak-Hyun Kim, Chang-Gyu Park, Junehyung Kim, Jong-Bum Kim, and Il-Kwon Oh</i>	5190
Effect of thermal neutron flux on borate and silicate glasses: Experimental and theoretical investigation for distribution, decay period, and absorbed dose rate of produced isotopes <i>O.L. Tashlykov, K.A. Mahmoud, D.O. Kaskov, and T.P. Volozheninov</i>	5222
Study on the effect of geometry and material property on collapse pressure of a helical steam generator tube under external pressure <i>Gyo-Geun Youn, Kwanghyun Ahn, and Myeong-Woo Lee</i>	5257
Defect monitoring system of the internal structures of a sodium fast reactor using an artificial intelligence model <i>Hyungi Byun, Han Gil Lee, Beom Kyu Kim, Geun Dong Song, and Bongsoo Lee</i>	5405

Nuclear Safety

Analysis of radiation conditions in the CFETR ion cyclotron resonance heating antenna <i>Gaoxiang Wang, Shanliang Zheng, Chengming Qin, Kun Xu, Yongsheng Wang, and Huiqiang Ma</i>	5037
Methodology for estimating the contribution of forest fires in loss of offsite power events <i>Joonseok Lim, Seungsu Han, Hyungdae Kim, and Gyunyoung Heo</i>	5096
Assessing the Phebus FPT-1 experiment: Insights from MELCOR 2.2 and ASYST codes <i>Peter Mician, Tomas Cerny, Taron Petrosyan, Stepan Foral, Karel Katovsky, and Michal Ptacek</i>	5136
A review of COHRISK: Multihazard risk quantification software for nuclear power plants <i>Eujeong Choi, Shinyoung Kwag, Jung-Han Kim, Jeong-Gon Ha, Daegi Hahm, and Minkyu Kim</i>	5281
Analysis of double-ended guillotine break accident of surge line in ACP100 based on coupling method: Development and validation of the coupling method <i>Fan Miao, Bin Zhang, Tianci Xie, Hao Yang, and Jianqiang Shan</i>	5377

Radiation Application

Study on quantitative interpretation of uranium spectral gamma-ray logging based on machine learning algorithm <i>Yan Zhang, Yujin Ye, Jun Qiu, Chunqing Fu, Haolong Huang, Renbo Wang, and Bin Tang</i>	4959
-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	------

Contents

Feasibility of a position-sensitive Cherenkov radiation detector using a reflector-coated liquid light guide Sangjun Lee, Siwon Song, Jae Hyung Park, Seunghyeon Kim, Hyungi Byun, Jinhong Kim, Seokhyeon Jegal, and Bongsoo Lee	5231
----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	------

Comparative analysis of machine learning-based dose assessment algorithms for TL dosimetry Soohyeok Lee, Hyoungtaek Kim, Hwijoon Jung, and Kyung Taek Lim	5414
--------------------------------------------------------------------------------------------------------------------------------------------------------------------	------

Radiation protection

Assessment of environmental hazard impacts in building materials (Marble), Gabal El-Galala El- Bahariya, Northeastern Desert, Egypt M.Y. Hanfi, R.M. Abd El Rahman, and Mohammad S. Alqahtani	4966
-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	------

Preparation and radiation shielding features of high density, transparent borosilicate glasses with different Bi ₂ O ₃ contents M.I. Sayyed, M. Rashad, Chaitali V. More, and Anjan Kumar	5043
-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	------

Al-B ₄ C-(Gd, Gd ₂ O ₃) composite materials: Synthesis and characterization for neutron shielding applications Yasin Gaylan and Barış Avar	5201
------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	------

Uranium quantification in radioactive waste drums using In-Situ Object Counting System (ISOCs) for safeguards purposes Jihyun Ahn, Seungmin Lee, and Hee Seo	5313
--------------------------------------------------------------------------------------------------------------------------------------------------------------------------	------

A PHITS based-computational model of a TRIGA-fueled subcritical reactor for gamma dose mapping Jowi Rapha P. Cruz, Alvie A. Astronomo, Gil Nonato Santos, and Ryan U. Olivares	5339
-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	------

Towards accurate dose assessment for emergency industrial radiography source retrieval operations: A preliminary study of 4D Monte Carlo dose calculations Sungho Moon, Haegin Han, Chansoo Choi, Bangho Shin, Gahee Son, Hyeonil Kim, Suhyeon Kim, Jaehyo Kim, In Gyu Yoon, Kyung Hwan Lee, and Chan Hyeong Kim	5428
---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	------

Reactor Physics

Continuous mapping of nuclear reactor core power using artificial neural network even in the presence of inactive detectors João D. Talon, Aquilino S. Martinez, and Alessandro C. Gonçalves	4983
----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	------

Hydrodynamics coupled circulating-fuel reactor equations in comoving frame and their analytical solutions for molten salt reactors Ayhan Yilmazer and Gökhan Pediz	4997
--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	------

Analysis of the atomic ratio of H and Zr effect on the neutronics parameters of ZrH moderated space nuclear reactor Xiaoliang Zou, Yanting Sun, Bo Yang, and Yibao Liu	5014
------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	------

A simplified SP3 NEM solver within a unified formulation for pin-by-pin core multi-group calculations Sicheng Wang and Ser Gi Hong	5078
---------------------------------------------------------------------------------------------------------------------------------------------	------

Study of circulating liquid fuel in a 1D critical system with thermal feedback Mathis Caprais, Daniele Tomatis, and André Bergeron	5212
---------------------------------------------------------------------------------------------------------------------------------------------	------

Contents

Neutron balance approach for inline critical rod position search calculation in Monte Carlo reactor analysis YuGwon Jo, Jaewoon Yoo, and Jae-Yong Lim	5297
Improving tally efficiency and accuracy of multi-group scattering matrix calculations in the Monte Carlo code NECP-MCX Hongchun Wu, Shuai Qin, Yunzhao Li, Jinkang Shi, Qingming He, and Liangzhi Cao	5305
Preliminary neutronics design and analysis of lithium heat pipe cooled space reactor with low-enriched uranium Xiaoliang Zou, Yanting Sun, Qiusun Zeng, Xiaojian Wen, Xiaogang Cao, Xi Huang, and Yibao Liu	5330
Thermal Hydraulics	
Numerical study on the size effect on the mixing in 2×1, 3×3 and 5×5 rod bundle subchannels Bin Han, Yuanyuan Yin, Xiaoliang zhu, Bao-Wen Yang, Aiguo Liu, and Shenghui Liu	5106
Improvement of macroscopic turbulence model for subchannel analysis in the rod bundle array Seok Kim, Jee Min Yoo, and Sang-Ki Moon.....	5118
Thermal dynamics aspect identification of loop heat pipe with capillary tube wick using nonlinear autoregressive exogenous neural network Yoyok Dwi Setyo Pambudi, Giarno, Sumantri Hatmoko, Anhar Riza Antariksawan, and Mukhsinun Hadi Kusuma	5145
Mesh morphing-based pre-processing and numerical simulation of blockage accident in lead-bismuth fast reactor fuel assembly Hao Sun, Yong Ouyang, Zihua Liu, Huo Liang, Hanyan Luo, and Zhikang Lin.....	5248
A three-dimensional CFD simulation of corium jet breakup in intensive vapor generation condition Jeong-Hyun Eom, Ji-Won Choi, Gi-Young Tak, In-Sik Ra, Huu Tiep Nguyen, and Hae-Yong Jeong	5269
Lifetime thermal analysis of the CANDU spent fuel storage canister at the Wolsung site Tae Gang Lee, Taehyung Na, Byongjo Yun, and Jae Jun Jeong	5320
Assessment of Look-up tables for the prediction of heat transfer coefficient distribution in rod bundles cooled by supercritical water Rashed MD. Sardar and Akhmed M. Baisov	5346
CFD simulation of thermal stratification and mixing in a Nordic BWR pressure suppression pool Xicheng Wang, Govatsa Acharya, Dmitry Grishchenko, and Pavel Kudinov	5357
Technical reviewers for Nuclear Engineering and Technology, 2024	5437
