

Contents

Nuclear I&C

- Design and implementation of the digital twin system for the negative ion based neutral beam injection
Yu Gu, Chundong Hu, Yuanzhe Zhao, Yang Li, Qinglong Cui, and Ruoxin Bai103540
- Dynamic characteristics test of safety class cable for nuclear power plants
Jung-Dae Son, Jae-Hong Kim, Kum-Young Song, and Jung-Han Kim103557
- Research on key technologies for early warning-position-angle monitoring and diagnosis of nuclear-grade pipeline leaks
Guohua Wu, Jun Ling, Yuan Diping, Sheng Fang, Wenlin Wang, and Yi Zhang103583
- Concept of understandable diagnostic cause visualization with explainable AI and multilevel flow modeling
Ji Hyeon Shin, Jung Sung Kang, Jae Min Kim, and Seung Jun Lee103589
- Study on the operation scheme of a pool-type lead-bismuth fast reactor
Muping Li, Aodi Sun, Ru Zhang, Peiwei Sun, and Xinyu Wei103600
- Multivariate model predictive control study of large scale PWR nuclear power plant based on the asymptotic method
Wentao Wang, Jinhong Mo, Peiwei Sun, and Xinyu Wei103573

Nuclear Fuel Cycle and Radioactive Waste Management

- VLC-enhanced autonomous rail vehicle for nuclear waste disposal
Zdenek Slanina, Lukas Danyš, Rene Jaros, Filip Krupa, Martin Dratnal, Daniel Polak, and Radek Martinek103543
- High-abundance Pu-238 produced by nuclear transmutation of liquid MA fuel in reactor
Dongguo Li103554
- Manufacturing B₄C-Al dispersion absorber plates using the picture-frame technique
Sérgio Ricardo Catharino de Mello, Mauricio Morales, Marco Antonio Stanojev Pereira, Frederico Antonio Genezini, Elita Fontenele Urano de Carvalho, and Michelangelo Durazzo103555
- An experimental investigation on the safety performance of dry ice blasting technology
Shulong Huang, Kewei Jiang, Jinjie Zhao, Lixiao Guo, Dan Luo, Yuhang Zhang, and Jialu Li103561
- Studies of laser cleaning and decontamination in liquid and polymerized media
Maxim Cheban, Konstantin Scherbakov, Dmitry Mamonov, Pavel Parabin, Serafima Filatova, Yaroslav Kravchenko, Sergey Klimentov, and Maxim Chichkov103569
- RUCAS: Software for assessing radiological risk to the public in metallic radioactive waste recycling from decommissioning nuclear facilities
Ugyu Jeong, Hyeongjin Byeon, and Jaeyeong Park103585
- Feasibility of nuclear monitoring for pyro-process using radiation measurement
YongDeok Lee and Jonghui Han103572
- Radionuclides measurements using Raman spectrometers for the analysis of advanced nuclear reprocessing
L.J. Bonales, I. Sánchez-García, and H. Galán103605
- Chlorination pathways of lanthanide and actinide oxides in LiCl-KCl molten salt: Electrochemical and spectroscopic studies
Chan-Yong Jung, Hwakyeung Jeong, Tae-Hyeong Kim, Han Lim Cha, Hye-Ryun Cho, Tae-Hong Park, and Sang-Eun Bae103610

Contents

Enhanced oxidative sulfuric acid leaching of granite-type uranium ore by oxygen nanobubbles: Kinetics and mechanism Ting Li, Guangyue Li, Xiaohui Liu, Jing Sun, Qian Li, and Zhao Cui	103608

Nuclear Fuel and Reactor Materials

Advanced fuel performance analysis of multi-layered coated accident-tolerant fuel (ATF) cladding using a coupled multiphysics approach Jiwon Mun, Saeed A. Alameri, and Ho Jin Ryu	103549
Effects of vacancies on the behavior of H in ZrC: A first-principles study Xun Lan, Jiajun Zhao, Dan Sun, Yong Xin, Zhipeng Sun, Xi Qiu, ShiChao Liu, Yuanming Li, and Jijun Zhao	103550
Development of FEMAXI-ATF for fuel performance modeling of SiC clad fuel involving PCMI Yoshihiro Kubo and Akifumi Yamaji	103558
Insights into irradiation creep coefficient in nuclear graphite from machine learning Yuzhou Wang, Derek Tsang, Yibo Zhang, Qiang Zhang, Fei Zhu, Ligang Song, and Xianfeng Ma	103559
Research on superheated steam discharge: Leakage process with friction and jet impingement process Tao Zhang, Qincheng Bi, Jinle Zhao, Fan Feng, Zhendong Yang, and Miao Gui	103568
Simulating nuclear fuel inspections: Enhancing reliability through synthetic data J. Knotek, J. Blažek, and M. Kopeć	103571
Adaptive probabilistic estimation of chromium coating thickness for nuclear fuel cladding using non-parametric regression with ECT sensors Jaebeom Lee, Hoyoung Kim, Jeong Won Park, Daegyun Ko, Hun Jang, and Wonjae Choi	103586

Nuclear Policy, Economics, and Human Resource Development

Indonesia's RDE program: A multifaceted approach to nuclear energy development encompassing human Resource building, public acceptance, and technological innovation Djarot Sulistio Wisnubroto, Geni Rina Sunaryo, and Yarianto Sugeng Budi Susilo	103560
--	--------

Nuclear Physics, Fusion, Laser, and Accelerator Technology

Shielding analysis and optimization of IFMIF-DONES test cell floor bolt penetrations using MCNP and advanced variance reduction techniques Gediminas Stankunas, Benjaminas Togobickij, Simona Breidokaite, Dilmurod Tuymurodov, and Andrius Tidikas	103565
A novel testing method of beam pointing accuracy for high-power laser facility Xiaolu Zhang, Lu Zhang, Song Gao, Huaiwen Guo, Jun Zhang, Junpu Zhao, Pin Yang, Longfei Jing, Ping Li, and Wei Zhou	103595
Advancements in primary radiation damage models and SRIM simulations: A review of radiation damage predictions Zulfiqar Ali, Furong Liu, Yinghao Wang, Hafiz Ghullam Rasool, Feiying Wang, and Muhammad Haseeb	103570
Detachable and robust three-dimensionally printed support structures for optical coupling of lightguide to photomultiplier tube Sang Yong Kim, Ji Young Choi, and Kyung Kwang Joo	103579

Contents

Structural Integrity Analysis and Plant Management & Maintenance

- Effect of bi-directional ground motions on the seismic pounding of adjacent NPP structures
Bidhek Thusa, Duy-Duan Nguyen, Md Samdani Azad, and Tae-Hyung Lee103542
- Effect of brazing parameters on the microstructure and mechanical properties of SiC ceramic joint with Zr-Cu-Nb filler metal
Bofang Zhou, Zixuan Leng, Hongxia Zhang, Zhaojie Zhang, and Wuman Wang103547
- Two heterogeneous algorithms for partitioned analysis of nuclear power plants considering soil-structure interaction
Lei Gao, Shaolin Chen, and Xiaoying Sun103393
- Floor response characteristics of NPP auxiliary building subjected to bi-directional ground motions
Bidhek Thusa, Duy-Duan Nguyen, Md Samdani Azad, and Tae-Hyung Lee103599
- Crack shape idealization of a complex crack to an equivalent through-wall crack using net-section collapse
Ju-Won Choi, Jun-Geun Park, and Nam-Su Huh103544

Nuclear Safety

- Evaluation of accident mitigation capability of passive core and containment cooling systems of i-SMR under representative LOCA and non-LOCA conditions
Chang Hyun Song, JinHo Song, and Sung Joong Kim103556
- From visual representation to signal flow connection: A new modeling approach for STAMP
Sung-Min Shin, Seong Woo Kang, and Jinkyun Park103602
- SAMG-based human reliability analysis method in support of level 2 PSA. Part II: Methodology and application
Jaewhan Kim, Jaehyun Cho, Sooyong Park, and Jinkyun Park103578

Radiation Application

- Proposal for improving the Korean standard industrial classification and KOLAS product certification system for the sustainable growth of the radiation device industry
Jinho Son, Tae Young Kong, Min Ho Lee, Seongjun Kim, Changju Song, Jiung Kim, Jaeok Park, Hee Geun Kim, Youngbeom Song, Da Yeong Gwon, Sung Jin Noh, and Kitaek Han103541
- RBE evaluation during the vertebral and brain cancer treatment using low-kV X-rays: A hybrid simulation approach
Reza Shamsabadi, Hamid Reza Baghani, and Zeynab Alvarmir103552
- Investigation of the effect of boric acid concentration on neutron reflection coefficient
Farnaz Karimi, Farhad Zolfagharpour, and Sara Azimkhani103564
- Development of a time-of-flight spectrometer for characterizing the quasi-monoenergetic neutron beam driven by a 30-MeV proton cyclotron
Tzu-Hsiang Lin, How-Ming Lee, Kuo-Yuan Chu, Ting-Shien Duh, Hui-Yu Tsai, Kuan-Che Lan, and Ming-Wei Lin103553
- Radioactivity evaluation induced by beamline components in the ocular proton treatment
Dong-san Kang, Yeseul Kim, Sangseok Ha, Sangrok Kim, and Wonmo Sung103582
- A sourceless efficiency calibration model of airborne γ -spectrometry based on Geant4
Cong Mei, Chen Fu, Wei Zhang, Jiangkun Li, Xudong Liang, Xue Wu, Qibin Luo, and Yaxin Yang103594

Contents

Evaluating backscatter factor variations in diagnostic radiology using different phantom materials A. Khallouqi, O. El rhazouani, H. Sekkat, A. Halimi, and Y. Madkouri.....	103593
Electric double layer and thermal radiation effects on micropolar blood particles conveying Cu-MoS ₂ -CuO nanoparticles in squeezed arterial channel A.M. Obalalu, Umair Khan, Mehboob Ul Hassan, Muhammad Waqas, A.D. Adeshola, and Latif Ahmad	103604
Optimal passivation process for improved spectroscopic grade CdMnTeSe single crystals based on chromic acid Jiwon Seo, Seungho Song, Jangwon Byun, Chaewon Yoon, Taejoon Mo, Younghak Kim, Hansoo Kim, Jung-Yeol Yeom, and Beomjun Park.....	103577

Radiation protection

Experimental and numerical investigation about single-event burnout in power normally-off AlGaIn/GaN HEMT Zhi-yu Xi, Ying Wang, Xin-Xing Fei, Biao Sun, Huo-lin Huang, Yan-xing Song, and Fei Cao	103538
Comparative evaluation of thyroid operational intervention levels depending on age and biokinetic model in nuclear accidents Soojin Shin, Wi-Ho Ha, Chanki Lee, Tae-Eun Kwon, Hyunwoo Lee, Yoonsun Chung, Ilje Cho, and Hyun Ki Kim.....	103539
Bi ₂ O ₃ additive effects on gamma radiation shielding properties of 45SiO ₂ -20B ₂ O ₃ -23Na ₂ O ₃ -9CaO-3Al ₂ O ₃ glass Mohammad Rezvani and Hossein Javid Ghezelgechi	103545
Assessment of natural radioactivity and radiological risks in soil from artisanal gold mining sites in West Pokot, Kenya Elijah Pkemoi, Elijah Mwangi, and Michael Mangala.....	103563
Impact of B ₄ C reinforcement on the microstructure, wear, hardness, corrosion behavior, and radiation shielding properties of Al-40Sm ₂ O ₃ hybrid composites Seyit Çağlar	103566
Assess the possibility of lead radioactive isotope accumulation in plant samples and the effective dose Vu Ngoc Ba, Huynh Truc Van, and Truong Thi Hong Loan	103581
Localization of a radioactive source with the predictive range-whale optimization algorithm method Zongheng Hong, Feiyun Cong, Bo Yang, Zhangyu Chen, and Yunlong Niu.....	103562

Reactor Physics

A simulation approach for start-up without secondary neutron sources of Hualong One: A Monte-Carlo-deterministic framework Jiandi Guo, Zhouyu Liu, Qingming He, Danbin Huang, Liangzhi Cao, and Hongchun Wu	103546
Application of the smoothed particle hydrodynamics method to the neutron diffusion equation Yiyang Luo, Nan Gui, Xingtuan Yang, and Shengyao Jiang	103592
Methodology and preliminary verification of generating heterogeneous multigroup microscopic cross-section libraries for neutron transport codes based on OpenMC Bowen Cui, Guohua Chen, and Xiaofeng Jiang	103590
The application of Kriging model for three-dimensional core power distribution calibration Tien-Tso Lee and Wu-Hsiung Tung	103591

Contents

Performance analysis of a two-step calculation procedure based on Monte Carlo and pin-wise diffusion methods for PWR core design <i>Changhyun Lim, Sung Joon Kwon, and Jooil Yoon</i>	103596
Development of Bamboo-Transient2.0 for three-dimensional PWR-core pin-by-pin Transient analysis <i>Junwei Qin, Yunzhao Li, and Liangzhi Cao</i>	103598
A comparative study on production of thermal neutron scattering data for H ₂ O based on molecular dynamics simulations using various water models <i>Haelee Hyun, Do Heon Kim, and Ser Gi Hong</i>	103606
Thermal Hydraulics	
Numerical study of thermal-hydraulic behavior on the integral test facility of HPR1000 containment based on CONTHAC-3D <i>Ji Xing, Yuan Chang, Hui Wang, Gong-Lin Li, and Ming Ding</i>	103548
